

Personality is what makes you  
“yourself”; the combination of all  
those characteristics that define you  
as a unique being.

What's your style?

Regardless of your style, now you have the possibility of unleashing your inner self. Mistica's simplicity, its minimal design and unique customisation possibilities make it one of a kind. Don't restrain yourself: imagination is the only limit.

## The “cover” window

Mistica is the first window made entirely of glass, with a customizable and interchangeable design born to reflect your unique, individual style.

It enhances the beauty of glass thanks to a practical and innovative cover frame that you can assemble with a simple click!

### CUSTOMIZATION

The cover is customizable starting from a single piece, allowing unlimited freedom in the choice of materials. Any kind of wood can be used, wall-paper, concrete,

### COMPLEMENTARY TO THE STYLE OF YOUR HOME

The cover frame is installed and perfected on site. It arrives at your home ready to be positioned with a simple gesture. Mistica's cover arrives fashionably late, 'dressing' the walls of your home with a simple 'click'.

### DESIGN FINISHES

The finishing touches are more refined than traditional ones for one simple reason: Mistica's cover is always and exclusively inside, therefore not subject to the atmospheric agents. Interior paints are silkier and more natural than external ones. They are simply more beautiful.

### MINIMAL STYLE

Mistica is an all-glass window. Internally there are no useless protrusions caused by frame or hinges, while externally one can only see the beautiful transparency of glass. Given the same surface, Mistica has a total-light effect.

### ENERGY-RATING LABEL

Mistica is a high-value technological product, a window with an advanced energy-rating label. It allows you to save money on the heating in winter and on cooling systems in summer.

### NO MAINTENANCE

Thanks to the internal cover and the hidden frame it will never require any maintenance.

### UNBREACHABLE / TAMPER-PROOF

The hidden sash has also some advantages in terms of safety because it doesn't offer any leverage points, nor the possibility of drilling holes into

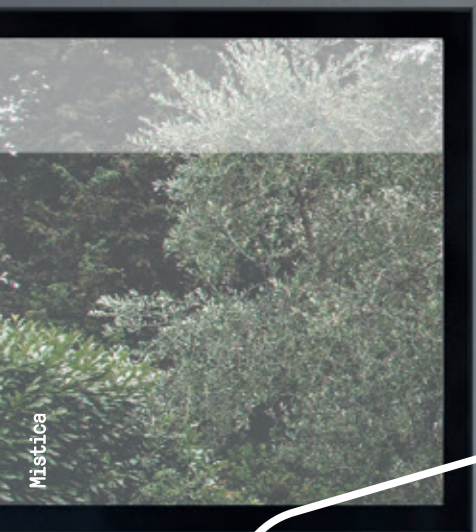

### EASILY ADAPTABLE

Mistica adapts to the needs of your home. Thanks to its flexible design, it is possible to insert this product within multiple architectonic styles.
